

Prestashop Addon Documentation

Module Quick administration of Product / Prestashop

Compatibility : **PrestaShop v1.6**

Developed by : *Dream me up*

All support requests must be made through the website PrestaShop Addons

Module presentation

This module allows you to search, filter and edit your products quickly from back-office.

Installation

The module does not require special handling:

- Copy the files in the directory "modules" of PrestaShop.
- Install the module from your administration space.
- This one is immediately available in the "Catalog" as the "Quick administration"

Module Configuration

In the module configuration page you can choose the display of combination prices including or excluding VAT.

Module Use

The top section allows you to search your database product.

Once the results are displayed, you can click on the labels directly, a text field then allows you to directly edit the content, you must then press the "enter" key on your keyboard to complete the change.

Click the icons on the right to change other fields: descriptions, titles referencing, etc ...

By clicking on the product image you get to the data sheet.
