# 1. Introduction

Prestashop is one the widely used eCommerce platform because of the awesome themes, features and extensions available for the store owners. Every store owner wants to provide a smooth and fast shopping experience to their customers to make their business more successful. The checkout process became the key point of this process. Hence, Prestashop One Page Checkout Addon is a solution for this issue. The One Page Checkout options reduces the additional efforts of the customers and allow them to complete the checkout process at the single page hence reduces the abandoned cart. The best part of the Prestashop one checkout module is the Social login option which allows the store admin to enable the Google and Facebook login options to complete the order.

***Note: The Prestashop one step checkout Module by Knowband is GDPR compliant.***

## 1.1 Admin-Benefits of One Page Checkout Prestashop Addon

- This quick checkout extension Prestashop SEO Friendly.
- The Prestashop fast checkout addon offers multilingual Support.
- Prestashop One Page Checkout module allows the admin to show/hide any fields.
- Prestashop One Page Checkout Extension offers automatic customer registration.

## 2. One Page Checkout Prestashop Module Installation Guide

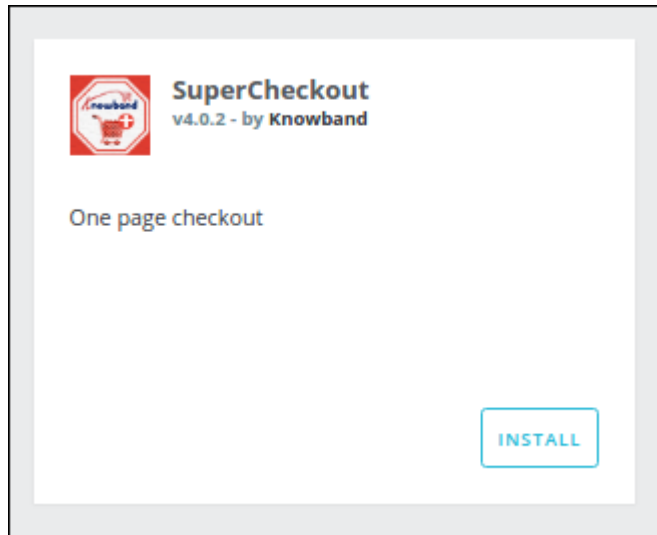

**2.1** Copy "SuperCheckout" module folder under your root\_directory/modules/of your store via FTP or use Prestashop interface to upload the plugin.

**2.2** After copy, Prestashop one page checkout module will be listed on module listing page in admin panel as shown given below screen.

**For version 1.6**

**For version 1.7**

**2.3** If Prestashop one page checkout module is not displaying on your module listing page, search it by filtering module with following details.

**Keyword:** Supercheckout

**Author:** [Knowband](#)

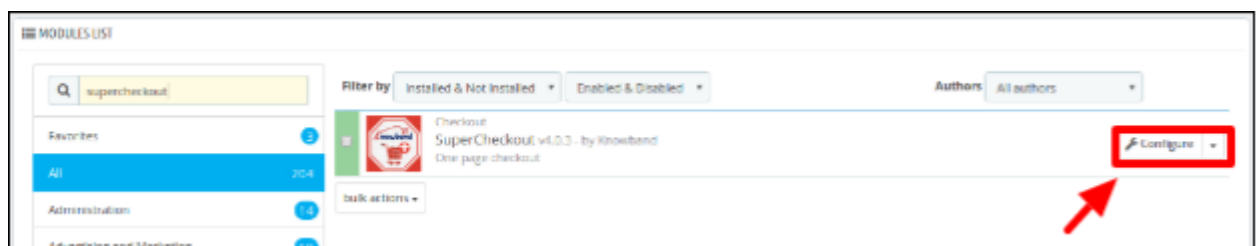

**Category:** Checkout

**Filter by:** Installed & Not Installed/Enabled & Disabled

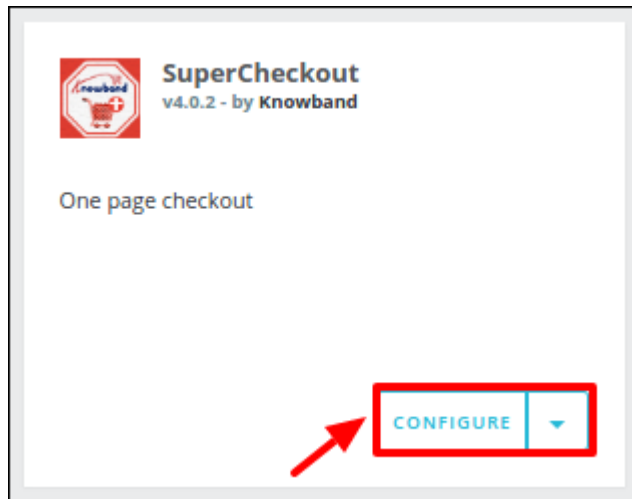

**Note:**

1. When you will click on install button, a pop up box will appear which will display warning messages. You can ignore these messages and move ahead. There will be no negative impact of this warning message on your store.
2. After installing Prestashop Supercheckout addon, a "configure" button will be in front of this one page checkout plugin on module listing page as shown in screen below:

**For Version 1.6**

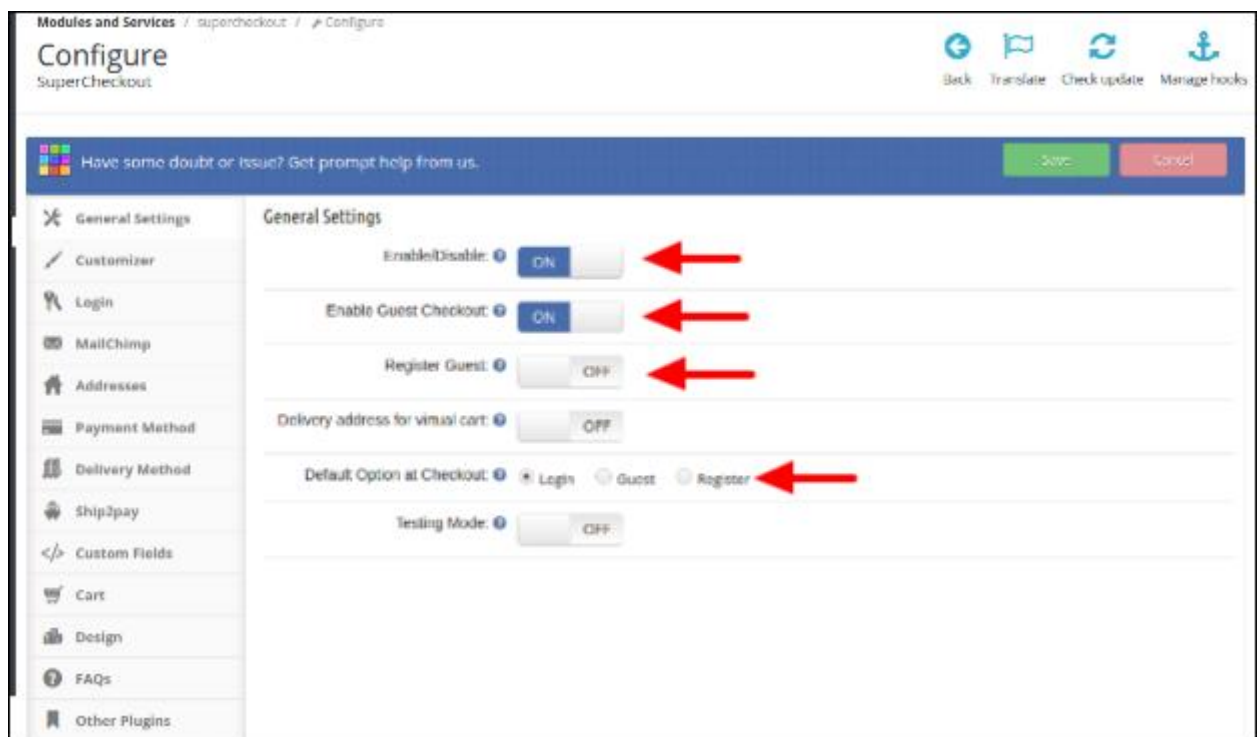

**For Version 1.7**

### 3. User Manual

1. To access this Prestashop one page checkout addon, Click on configure button of supercheckout module. On clicking, One Page Checkout Prestashop module interface will be open and following screen will be display as given below:

#### 3.1 General Settings of Prestashop Fast Checkout Addon

- **Enable/Disable:** To enable the Prestashop one page checkout plugin, switch the enable button from OFF to ON. Default value will be OFF.

- **Enable Guest Checkout:** By enabling this option of the Prestashop quick checkout module, store will allow the customer to checkout as a guest. Default value will be OFF
- **Register Guest:** By enabling this option of the simplified checkout Prestashop module, store will register guest automatically and send registration email to corresponding customer. Default value of this field of Prestashop One Step Checkout Addon will be OFF.
- **Default Checkout Option:** There are 3 options in this field of the One Step Checkout Prestashop Extension, which will be displayed at front end. With these options of the fast checkout Prestashop module, admin can set which option will be displayed to customers on the one page checkout. These options are:

**Login:** If this option of the Responsive one page checkout Prestashop addon is selected, customer will see the login form in login section.

**Guest:** If this option of the Prestashop responsive one step checkout addon is selected, customer will see only the email field in login section.

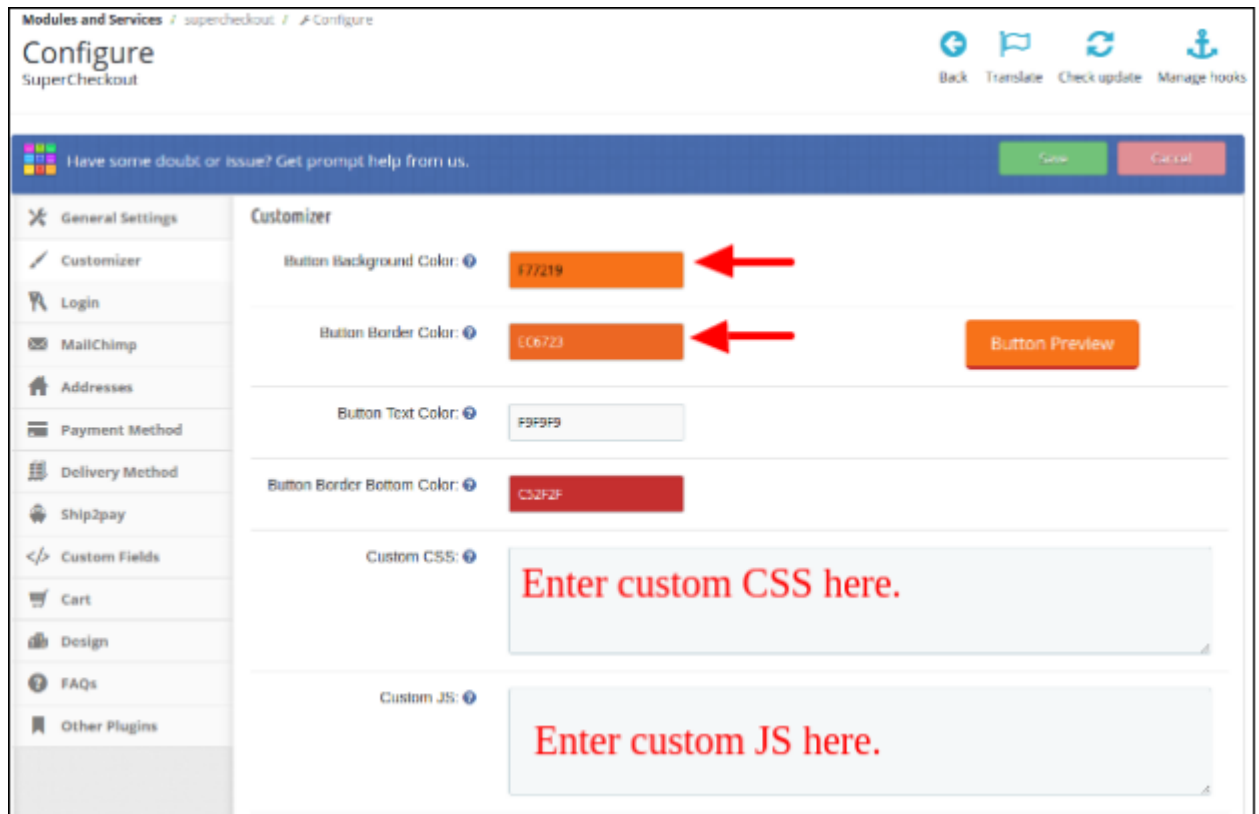

**Register:** If this option of the one page checkout Prestashop module is selected, customer will see the registration form in login section.

On front, customer can also change the checkout option. By default, login option will be selected

- **Testing Mode:** If you want to test the Prestashop one page checkout addon before making it live on your store then you can enable this option. While this option of the One Step Checkout Prestashop Extension is enabled your customers are redirected to the normal checkout page but you can open the SuperCheckout page directly through URL. The URL for the same appears below this option once you enable it.

### 3.2 Customizer settings of Prestashop fast checkout module

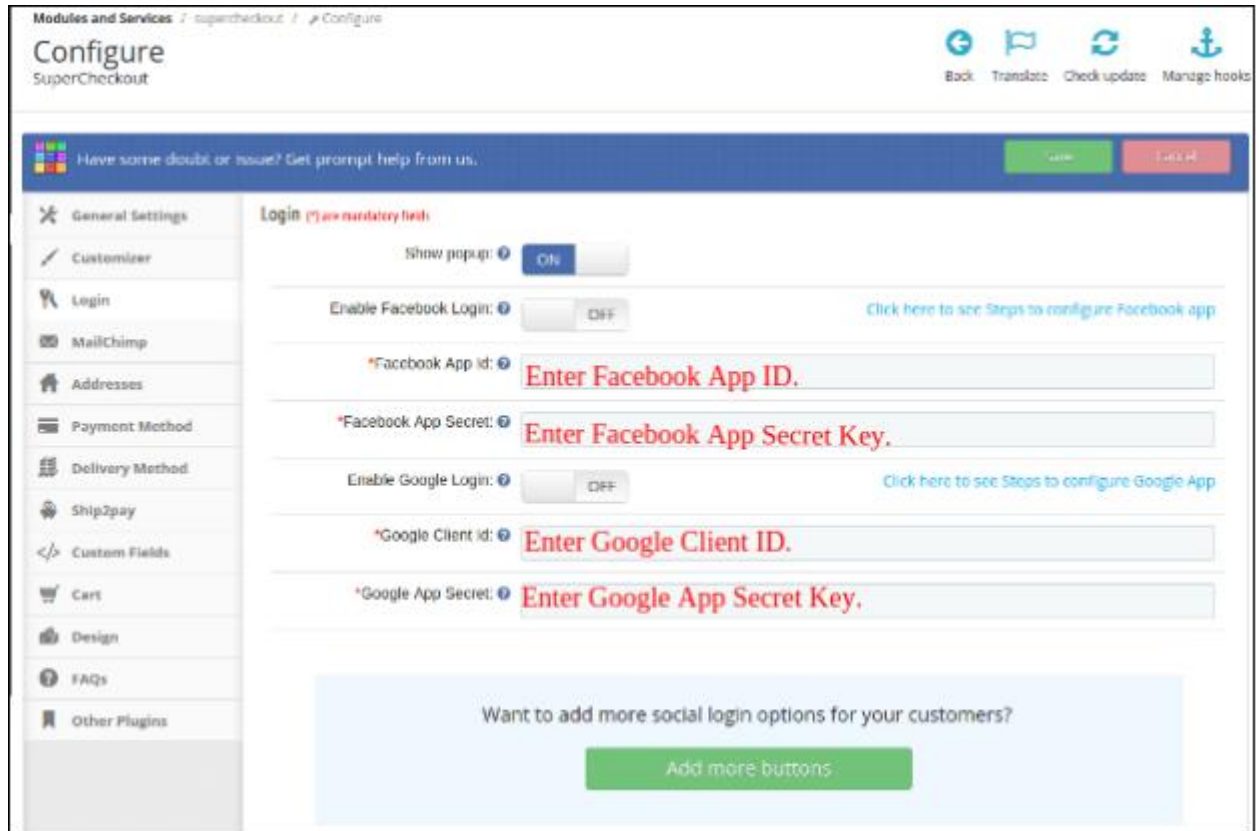

This tab in Prestashop one page checkout addon has the features using which the admin can modify the checkout front end by adding some CSS or JS in its fields. This tab of Prestashop fast checkout addon already has the feature to change the colors of buttons which appear in the checkout. Whatever CSS will be placed in the custom CSS field that CSS will appear in the front of the store and same is the case with custom JS field.

### 3.3 Login Tab of simplified checkout Prestashop module

1. This tab of Prestashop fast checkout addon basically contains setting to enable /disable [Facebook](#) and [Google](#) registration & login as shown below.

- **Enable Facebook Login:** To enable Facebook Registration & Login, switch the button from OFF to ON. But before you do that do get Facebook APP ID and APP SECRET from <http://developers.facebook.com> without these keys, this functionality of the Prestashop single step checkout addon will not work. By default, this functionality of the one page checkout Prestashop addon will be disabled.
- **Enable Google Login:** To enable Google Registration & Login, switch the button from OFF to ON. But before you do that do get Google APP ID, CLIENT ID and APP SECRET from <https://code.google.com/apis/console> without these keys, this functionality of the quick checkout addon Prestashop will not work. By default, this field of the Prestashop One Step Checkout Addon will be disabled.
- Please read the Annexure A to setup Google and Facebook login.

### 3.4 MailChimp Tab of the One Step Checkout Prestashop Extension

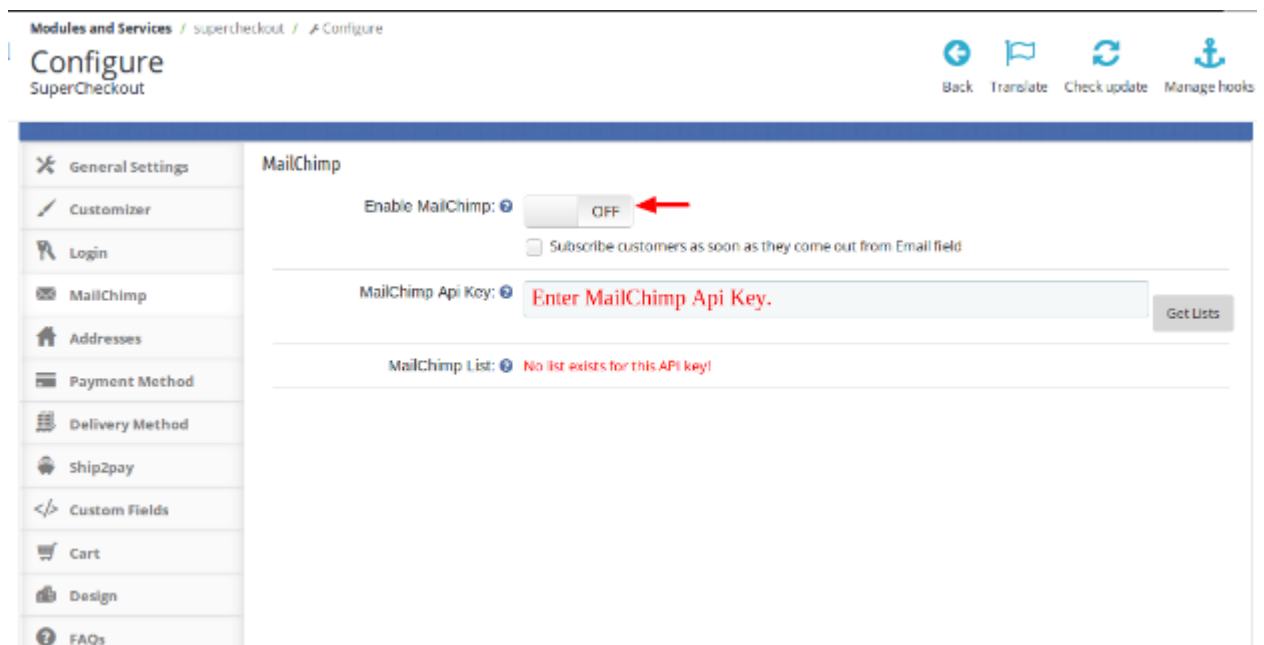

Mail Chimp is an email marketing service by which you can send bulk newsletter/offer emails to your customers. Mail Chimp also provides many attractive Templates and many more features. Our Prestashop one page checkout module allows you to add customer email directly to mail chimp list as soon as they register using our Prestashop one page checkout addon.

For using Mail Chimp you need to have an API Key.

### 3.3.1 How to configure Mail Chimp?

1. Login to your Mail Chimp Account.
2. Click on the right corner tab > Choose Profile > Extras > API Keys.
3. Here Admin Can Create an API key by click on “Create a Key” Button.
4. Copy the API key.
5. Admin can also make Different list for Each Social login customer by click on “List” in the Top Menu Bar.
6. Now Paste the API Key in the Provided Mail chimp API Key section and click on “Get List” Button.
7. Select the list from Dropdown menu.

### 3.3.2 Mail Chimp Settings:

1. **Enable/Disable:** To enable the Mail chimp, switch the enable button from OFF to ON. Default value will be “OFF”.
2. **Subscribe Customer Checkbox:** Check this option of the Responsive one page checkout Prestashop module, if you want to subscribe customers to mail chimp as soon as he comes out from email field. Please note that this function will not subscribe them to Prestashop list. Our mail chimp integration is responsible to subscribe only to mail chimp list.
3. **Mail Chimp API Key:** Enter Your Mail Chimp API Key and Click on “Get List” button.
4. **Mail Chimp List:** Select your desired list and save settings.

### 3.9.3 Confirm

To Show/Hide cart summary options from the checkout page check/uncheck the checkbox present in front of Cart Summary Option label.

### 3.10 GDPR Setting Tab of the One Page Checkout Prestashop Addon:

This field of the Prestashop one page checkout module allows the admin to add the opt-in boxes (checkbox) on the checkout page to meet the GDPR requirements. Admin can add the multiple opt-in boxes at the checkout page. As per the GDPR directives ***“The GDPR is clearer that an indication of consent must be unambiguous and involve a clear affirmative action (an opt-in). It specifically bans pre-ticked opt-in boxes. It also requires distinct (‘granular’) consent options for distinct processing operations. Consent should be separate from other terms and conditions and should not generally be a precondition of signing up to a service. You must keep clear records to demonstrate consent”.***

### 3.10.1 Adding New Policy:

The one page checkout Prestashop addon allows the admin to add as many policies. To add new policy, the admin will just need to click on the “Add New” option. After doing so, a popup will appear, where the admin will ask to fill the details of the policy.

Configure SuperCheckout

**New GDPR Privacy setting**

Privacy Policy Label  en-us

Page URL to Link The Label (optional)   
Page URL of privacy policy page where you have define your privacy policy.

Required ☐ YES ☐ NO

Active ☒ YES ☐ NO

Close **SAVE**

**Privacy Policy Label:** In this field, enter the privacy policy label. The text entered here will be visible to the user on the front end.

**Page URL to Link the Label:** This field is not mandatory. But if you have any URL to link the label where you have defined your privacy policy, then enter the same here.

**Required:** This option is to make the policy field required or optional. If you make this field optional then the customers can continue to place his order without providing the consent. If the field has been marked as mandatory then only after providing his consent the user will be able to place his order.

**Active:** This field of the GDPR setting is to make the opt-in option enabled or disabled at the front end.

Let's take a look at the screen shot below:

The screenshot displays the Prestashop one-step checkout interface. It is divided into four main sections: LOGIN OPTIONS, DELIVERY METHOD, PAYMENT METHOD, and CONFIRM YOUR ORDER.

- LOGIN OPTIONS:** Includes fields for Email and Password, and radio buttons for "Login into shop", "Guest Checkout", and "Create an account for later use". A "LOGIN" button is at the bottom.
- DELIVERY METHOD:** Lists three options: "Default Free Shipping - Paras Porwal" (Free), "0000Pickup at store" (Free), and "My carrier" (\$7.00). A "PAYMENT METHOD" section below it shows "Bank wire" as the selected option.
- CONFIRM YOUR ORDER:** A table showing the order details:

Description	Model	Qty	Price	Total
Glasses_001 <a href="#">Size: S, Color: Yellow</a>	demo_5	1	\$14.25 <del>\$15.00</del> -5%	\$14.25 *
Total products				\$14.25
Total Tax				\$0.00
Voucher				Apply
Total				\$14.25

Below the table is a text area for "Add Comments About Your Order". At the bottom, a red box highlights the consent section with three checkboxes: "I agree to the terms of service and will adhere to them unconditionally." (with a link to "Read the term of services"), "Sign up For Newsletter", and "I Agree to Privacy Policy". A red arrow points from the "My carrier" delivery method option to this consent section. A "PLACE ORDER" button is located at the bottom right.

### 3.11 Customer Consent Tab of the one step checkout Prestashop module

This field of the Prestashop one step checkout displays the data of the all the customers who have agreed to any privacy policy(s) defined by the admin. The data will also display the date, time and order reference number as well. In order to view the list, the admin must have to enter the email id or order reference number and click on the Filter button. The accepted customer consent details will be displayed along with the order reference number, customer name, email id, accepted consent, date, and time as well. Let's take a look at the screen shot below:

**Step 20:** Now click on save.

The screenshot shows the Facebook App Developer dashboard for 'Demo App' (APP ID: 185498122234963). The status is 'In Development'. The 'Web' tab is selected under the platform options (iOS, Android, Web, Other). The section '1. Tell Us about Your Website' is active. It prompts the user to 'Tell us what the URL of your site is.' and provides a 'Site URL' input field. A red circle with the number '20' and an arrow points to the 'Save' button. A 'Continue' button is also visible at the bottom right of the section.

**Step 21&22:** Click on Settings and add a Valid OAuth Redirect URIs.

### Valid OAuth Redirect URIs:

**`http://www.yourstore.com/index.php?fc=module&module=supercheckout&controller=supercheckout&login_type=fb`**

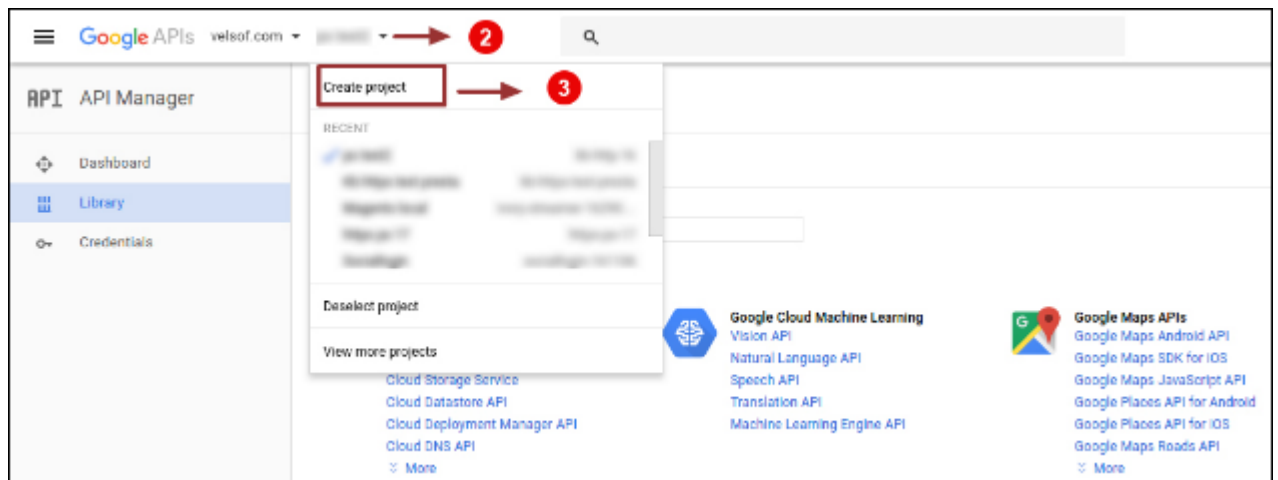

The screenshot shows the 'Client OAuth Settings' section of the Facebook App Developer dashboard. The status is now 'Live'. The 'Settings' option under 'Facebook Login' is highlighted with a red box and a red circle with the number '21' and an arrow pointing to it. The settings include:
 

- Client OAuth Login:** Enabled (Yes).
- Web OAuth Login:** Enabled (Yes).
- Enforce HTTPS:** Enabled (Yes).
- Force Web OAuth Reauthentication:** Disabled (No).
- Embedded Browser OAuth Login:** Disabled (No).
- Use Strict Mode for Redirect URIs:** Enabled (Yes).

 At the bottom, the 'Valid OAuth Redirect URIs' section has a text input field containing the URL `http://www.yourstore.com/index.php?fc=module&module=supercheckout&controller=supercheckout&login_type=fb`. A red circle with the number '22' and an arrow points to this input field.

**Step 23&24:** Click on "App review". And mark "Make 'your app name' Public" to Yes.

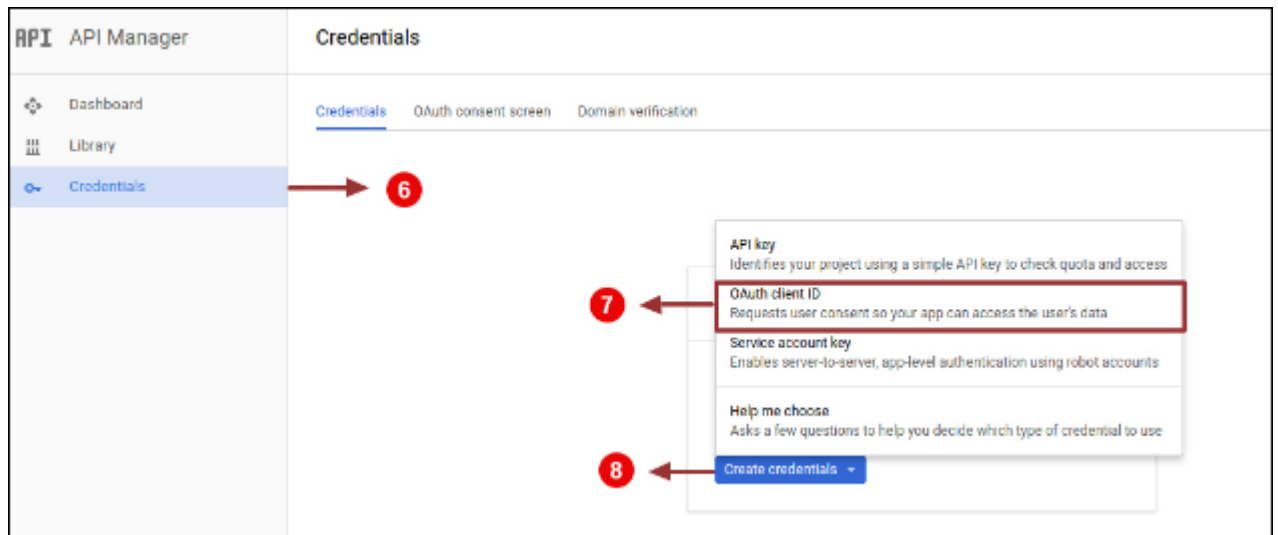

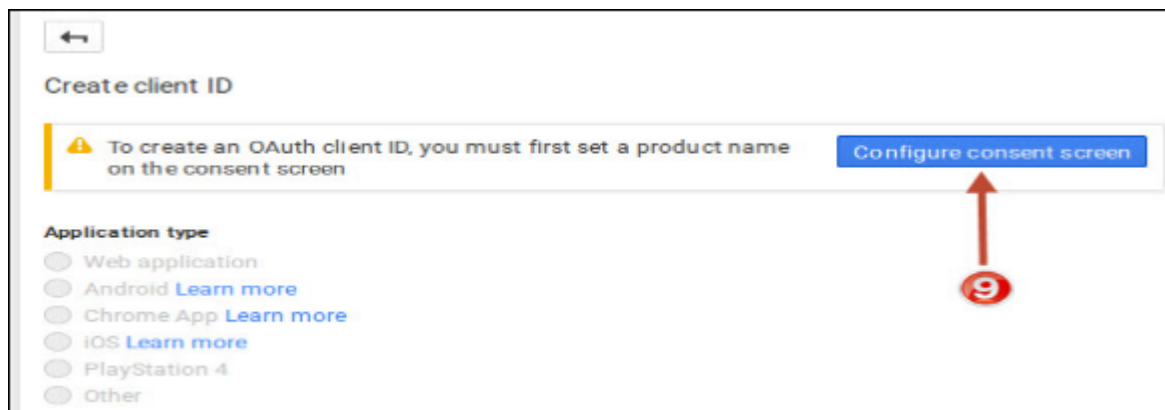

3. Enter your desired Project Name and click on “Create”.

4. Go to API Manager, click on Create Credentials and select OAuth client ID option .

5. Click on “Configure consent screen”button.

6. Enter “Email Id”,“Product Name” and then click on “Save”button.
